ss. \_\_\_\_\_

BEFORE THE DIVISION OF OIL, GAS AND MINING  
DEPARTMENT OF NATURAL RESOURCES  
STATE OF UTAH

IN THE MATTER OF TENTATIVE  
DECISION TO APPROVE THE MINING  
AND RECLAMATION PLAN FOR  
LARSON LIMESTONES PELICAN  
POINT QUARRY, UTAH COUNTY,  
UTAH

NO. M/049/011

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF  
PRODUCTION, MINERAL AND ROYALTY OWNERS, AND  
PARTICULARLY ALL PERSONS INTERESTED IN SECTION 31,  
TOWNSHIP 6 SOUTH, RANGE 1 EAST, SLBM, UTAH  
COUNTY, UTAH.

Notice is hereby given by the division of Oil, Gas and  
Mining of its tentative decision to approve Larson Limestone's  
large Mining and Reclamation Plan for the Pelican Point  
Quarry. Mining activities will effect the following area; E1/2  
of Section 31, Township 6 south, Range 1 East, Utah county,  
Utah.

Larson Limestone has submitted a large mining operation  
permit application to mine in an existing quarry which was  
previously permitted as a small mining operation.

The operator will employ the following mining and  
reclamation techniques on approximately 33.1 acres of  
private land.

### During Operations

The Pelican Point Quarry extracts and processes  
limestone aggregate rock primarily for use as road base and  
other construction products. These uses for the aggregate  
rock product are the chief revenue source. When veins or  
lenses of "high-grade" Limestone ore are encountered in the  
mining process, it is extracted and processed separately.  
These high-grade deposits have a higher calcium carbonate  
signs in locations where public access is feasible, this high-

available: 5) construct berms, fences and/or barriers above  
high walls or other excavations when required by DOGM.

Deleterious or potentially deleterious material shall be safely  
removed from the site or left in an isolated or neutralized  
condition such that adverse environmental effects are  
eliminated or controlled.

Disturbed areas will be regraded to a stable configuration and  
sloped to minimize safety hazards and surface erosion while  
providing for successful revegetation. Onsite roads and pads  
shall be reclaimed when they are no longer needed for  
operations or postmining uses. When a road or pad is  
turned over to the property owner or another land managing  
agency for continuing use, the operator shall turn over the  
property with adequate surface drainage structures and in a  
condition suitable for continued use.

Recontoured areas will be drill seeded where possible using  
principally native plant species. Seeding will be done in the  
late fall.

Except as noted in the Variance Section of the mine plan, all  
buildings and associated mining related facilities (including  
buildings, processing structures, conveyors, storage  
structures, etc.) will be dismantled and hauled off-site to  
appropriate salvage, scrap and disposal areas. Concrete  
footings, foundations, etc., will be crushed with Onsite  
processing equipment and sold as aggregate products, or  
buried under the recontoured fill material.

The pad and fill materials where the surface facilities are  
located will also be sold as product. The fill materials will be  
removed to the approximate original contour and graded to a  
stable configuration. Once the original land configuration is  
achieved, the facilities area (including the haul road) will be  
ripped to a depth of 12 inches, followed by fertilization (if  
needed) and drill seeding.

The person representing the company is Mr. Mark  
Hardman, Phone (801) 768-4820. Larson Limestone is  
fulfilling obligations under the Utah Mined Land Reclamation  
Act of 1975, Utah Code Ann. §40-6-18.

Any person or agency aggrieved by this tentative decision  
to issue approval is hereby requested to submit written  
protest within thirty (30) days of the date of publication to  
Mary Ann Wright, Associate Director of mining, Division of  
Oil, Gas and Mining, 1594 West north Temple, Suite 1210,  
Box 145801, Salt Lake City, Utah 84114-5801, setting forth  
factual reasons for the complaint. If no responsive written  
protests are received by the Division within 30 days after the  
last date of publication, the tentative decision of the Division  
will be final.

DATED THIS 9th day of November, 1998.

Legal Notice No. 500049 Published in The Daily Herald  
November 18, 1998

I, Konnie Lynn Davis, being first duly  
sworn depose and say that I am the  
Legal Billing Clerk of the Daily  
Herald, a newspaper of general  
circulation, published seven times each  
week at Provo, Utah, County of Utah;  
that the notice attached hereto,  
#500049-BEFORE THE DIVISION OF, and  
which is a copy, was published in said  
newspaper, the first publication  
having been made on the 18th day of  
November, 1998, and the last on the  
18th day of November, 1998; that said  
notice was published in the regular and  
entire issue of every number of the  
paper during the period and times of  
publication, and the same was published  
in the newspaper proper and not in the  
supplement.

## The Daily Herald

STATE OF UTAH

Utah County

ss.

BEFORE THE DIVISION OF OIL, GAS AND MINING  
DEPARTMENT OF NATURAL RESOURCES  
STATE OF UTAH  
IN THE MATTER OF TENTATIVE  
DECISION TO APPROVE THE MINING  
AND RECLAMATION PLAN FOR  
LARSON LIMESTONES' PELICAN  
POINT QUARRY, UTAH COUNTY,  
UTAH

NOTICE TO TENTATIVE  
DECISION TO APPROVE

NO. M/049/011

THE STATE OF UTAH TO ALL OPERATORS, TAKERS OF  
PRODUCTION, MINERAL AND ROYALTY OWNERS, AND  
PARTICULARLY ALL PERSONS INTERESTED IN SECTION 31,  
TOWNSHIP 6 SOUTH, RANGE 1 EAST, SLBM, UTAH  
COUNTY, UTAH.

Notice is hereby given by the division of Oil, Gas and  
Mining of its tentative decision to approve Larson Limestone's  
large Mining and Reclamation Plan for the Pelican Point  
Quarry. Mining activities will effect the following area; E1/2  
of Section 31, Township 6 south, Range 1 East, Utah county,  
Utah.

Larson Limestone has submitted a large mining operation  
permit application to mine in an existing quarry which was  
previously permitted as a small mining operation.

The operator will employ the following mining and  
reclamation techniques on approximately 33.1 acres of  
private land.

#### During Operations

The Pelican Point Quarry extracts and processes  
limestone aggregate rock primarily for use as road base and  
other construction products. These uses for the aggregate  
rock product are the chief revenue source. When veins or  
lenses of "high-grade" Limestone ore are encountered in the  
mining process, it is extracted and processed separately.  
these high-grade deposits have a higher calcium carbonate  
content and are lower in silicates. when feasible, this high-  
grade limestone is sold as a secondary product and is  
generally used in air emission control systems.

Limestone rock is quarried from the hillside by standard  
drilling and blasting methods. When blasting is conducted, it  
is contracted out to a qualified company trained in blasting  
design and practices. Typical blasting frequency averages six  
times a year. Once the rock is removed it is separated and  
adjusted to specific sizes in two facilities - the Crushing Plant  
and the Grinding Plant. When high-grade limestone ore is  
encountered, this material is delivered to the "Grinding Plant"  
where it is processed then stored in two silos to await transit  
to market.

To minimize the hazards for public safety the  
operator will: 1) close or guard any shafts and tunnels to  
prevent unauthorized or accidental entry, 2) properly dispose  
of trash, scrap metal and wood, and extraneous debris; 3)  
plug or cap exploration holes; 4) post appropriate warning  
signs in locations where public access to operations is readily  
available, and 5) construct berms, fences and/or barriers  
above high walls or other dangerous excavations when  
required by DOGM.

#### Following Operations

Minimize hazards to the public safety and welfare by: 1)  
permanently sealing any shafts and tunnels; 2) appropriately  
dispose of any remaining rash, scrap metal and wood,  
buildings, extraneous debris, and other materials incident to  
mining; 3) plug exploratory holes; 4) post appropriate warning

The pad and fill materials where the operations are located  
will also be sold as product. The fill materials will be  
removed to the approximate original contour and graded to a  
stable configuration. Once the original land configuration is  
achieved, the facilities area (including the haul road) will be  
ripped to a depth of 12 inches, followed by fertilization (if  
needed) and drill seeding.

The person representing the company is Mr. Mark  
Hardman; Phone (801) 768-4820. Larson Limestone is  
fulfilling obligations under the Utah Mined Land Reclamation  
Act of 1975, Utah Code Ann. §40-6-18.

Any person or agency aggrieved by this tentative decision  
to issue approval is hereby requested to submit written  
protest within thirty (30) days of the date of publication to  
Mary Ann Wright, Associate Director of mining, Division of  
Oil, Gas and Mining, 1594 West North Temple, Suite 1210,  
Box 145801, Salt Lake City, Utah 84114-5801, setting forth  
factual reasons for the complaint. If no responsive written  
protests are received by the Division within 30 days after the  
last date of publication, the tentative decision of the Division  
will be final.
